

CoarseSampleRateFactor

CoarseSampleRateIndex

CoarseSampleRate

```
graph LR; A[CoarseSampleRateFactor] --> C[CoarseSampleRate]; B[CoarseSampleRateIndex] --> C;
```

The diagram illustrates a calculation or dependency where two input factors, 'CoarseSampleRateFactor' and 'CoarseSampleRateIndex', are combined to determine the 'CoarseSampleRate'. The inputs are shown in white boxes on the left, and the resulting 'CoarseSampleRate' is shown in a gray box on the right. Blue arrows indicate the flow of information from the inputs to the output.
